I plan to begin withdrawing money from my investment in

15 years or more

Once I begin withdrawing from my investment, I plan to withdraw all of the money in

10 years or more

When I hear "risk" related to my investment...

I see an opportunity for better returns

Investments will occasionally go down in value.

If you had \$20,000 invested for the long term, how much of a drop in value could you tolerate over a 12-month period?

A drop of 10% or more (\$2,000 or more)

Investing involves taking some risk. The level of risk will vary depending on the Fund(s) you are invested in.

If you could increase the chances of improving your investment return by taking some risk would you be willing to

Take on more risk

Your risk profile is Aggressive

You are prepared to endure significant fluctuations in the value of your investment You value higher potential returns over the longer term ahead of short-term fluctuations in your investment value

You don't need access to your investment until many years in the future

Milford Funds and their risk profiles

The level of risk each fund has depends on the types of assets it invests in.

It is also worth remembering that a good way to mitigate some risk is to invest in more than one Fund or across more than one type of investment. This process is called diversification and you can read more about it at <a href="https://mitratasec.com/new-to-invest-investment
